

HV-Perf High Volume Perforator

From *Recycling Equipment Manufacturing, Inc.*

AUTOMATED INDUSTRIAL DUTY FULL BEVERAGE DESTRUCTION SYSTEM

REM-INC. proudly introduces our next generation full beverage destruction Equipment for short-fills, product transition, expired product, etc..

With a processing capacity of up to 20,000 containers per hour, the **REM Model HV Perf Compactor** is the full beverage destruction equipment you've been waiting for. Designed to fill the need for a very high volume full beverage destruction system with the added benefit of absolutely no handling of the destroyed product by your in-plant labor. REM Inc. has produced the HV Perf Compactor system to be a completely bulk-fed, low RPM perforating system that also compacts your destroyed containers into a waiting receiver box. This equipment will save you valuable man-hours by automating the tedious chore of manually handling your waste product.

Each model comes complete with a bulk feed hopper mounted on top of the perforator-crushing unit, which is completely sealed inside a gasketed housing. The perforator-crushing unit discharges the destroyed containers into the Rempactor® auger compactor, which is equipped with a large volume drain for liquid removal. The destroyed containers are automatically compacted into a waiting receiver box for hauling to your recycler. All components are automatically rinsed to dilute residual beverage fluids inside the unit and to prevent product build-up in the system.

This system was designed around the Allen Bradley PLC controller to provide you with automated control with time proven technology, making the REM Model HV Perf Compactor a very reliable, hard working part of your plant equipment.

To put REM's model HV-Perf Compactor to work for you call

HV-Perf Compactor System

A Leader in Recycling Equipment Since

Features:

- Galvanized interior finish
- 1 cubic yard hopper capacity
- Perforator speed: 35 RPM
- Perforator horsepower: 7.5 HP
- Auger speed: 8 RPM
- Auger horsepower: 10 HP
- Up to 12:1 compaction ratio
- Sealed perforator housing
- Allen-Bradley Micro Logic PLC
- Automated rinse system
- Inverter duty motors
- Automated lubrication system

Gear Drive Specifications:

- AGMA Class 13 standards
- Unicase one piece housings
- Stainless Steel resin protective finish on reducer
- Mil spec gear motor units

Options:

- Container tipper
- Automatic tipper operation
- Full safety interlocked cage
- Container with drain
- Collection drain
- Collection drain with pump

SPECIFICATIONS	
Max. Discharge Height	14' 2"
Length	7' 3"
Width	6' 8"
Hopper load height	9' 3"
Hopper Width	71"
Hopper Capacity	1 cu. yd.

Electrical safety features:

- 240/480 volt, three phase
- Electrical components are UL listed
- NEMA-4 (hose proof) enclosure
- Motor overload/short circuit protection
- PLC is surge protected

LIMITED ONE YEAR WARRANTY

*All dimensions are nominal +/- 1"

*Specifications subject to change without notice, without incurring responsibility to previous units sold
